

# Tech specs for live shows

The arts council has a digital PA and LED lighting setup, housed in an equipment trailer, which is available for hire, and can be transported to most locations for your show.

## PA

The PA includes a Behringer X32 16-channel digital mixing desk, with remote iPad consoles. The front of house sound is provided by a Behringer Eurolive B1500D active 15" subwoofer (1400 Watts) and a Behringer Eurolive B615D active 15" PA speaker (1500 Watts) on each side. There are four Behringer F1320D active 12" foldback monitors available. Six wireless mics from VocoPro are available, as well as eight wired dynamic mics from Shure, and six clip-on style drum mics, including two overhead condensers. There is provision for up to six channels of DI inputs. And multiple microphone stands from Hercules and others.

## LIGHTS

Lighting is all LED-based and DMX-controlled. There are six 120W LED par cans (4in1 RGBW), four 54W wall-wash LED bar lights (RGB), four 105W LED moving head lights (RGBW), two fog machines and a remote wireless control desk. There is a 10m span aluminium truss on wind up steel tripods for locations with no built-in lighting bars.
